*Please know that we take our job of Dj'ing (music selections) very seriously, there is a bit of psychology and a lot of experience to reading a crowd and keeping them happy. We have a huge selection of music, wedding favorites (believe it or not that's what they come to dance to most of the time) and all other genres also. We always check with our clients to approve any questionable songs and genres (our songs are all radio (clean) versions, you will not have to worry). We will work hard to keep events as classy as you desire. We always know it's the little things that count, we know when to try and get them going (trying mic work and hit songs from different genres) and we know when to sit back and let them just enjoy the music. Please, before you list any songs as "no" consider that we do have "fun songs" (as tiresome as they may be to hear again) that 90 percent of the time, done in the "right way" can make for a **great** start to the evening of dancing. Please feel free to contact your Dj personally for any reason at all. We want you to sit back and enjoy your event and leave the rest to us. In addition to providing professional Dj/MC service we also Coornate the flow of your event connecting with **You**, the Hall, the Photographer, Possible Family members, and all others that may pertain. During the event we will be in necessary contact with you in order to ensure the success of your event.*

NOTES:
